

*the "engaged" position.*

*when all six brake weights are in*

*Maximum braking is obtained*

*4. All six brake weights "disengaged".*

*Four brake weights "engaged" disengaged".*

*3. Two brake weights "engaged"*

*2. Four brake weights "engaged" and*

*1. All six brake weights "engaged".*

*combinations are as follows:*

*It is important to note that the brake weights must be set in*

*opposite pairs to maintain a balanced. That is, a single weight*

*should not be "engaged" or "disengaged" by itself. The weight*

*should be set in the set-up that best suits your fishing needs.*

*System™ for the set-up that best suits your fishing needs.*

*optimal casting performance, experiment with UltiMATE Brake*

*with the magnetic break dial on the sideplate of the reel. For*

*dissipation; the magnetic braking system is easily adjusted externally*

*"disengaged" for a faster spool rotation to maximize your casting*

*braking system. The brake weights can easily be locked or*

*engaged", providing maximum braking from the centrifugal*

*centrifugal brakes are present at the factory with 4 brakes on or*

*down near the end of the cast to prevent line overrun. The*

*PM's are the greatest. The magnetic brake system slows the spool*

*and prevent backlash at the beginning of the cast when spool*

*function of the centrifugal brake system is to control spool speed*

*other to provide the ultimate casting experience. The primary*

*setings. Both braking systems work in conjunction with each*

*brake system to provide a virtually limitless range of spool control*

*brake system is combined with an externally adjustable magnetic*

*brake system to prevent the centrifugal brake system from*

*stopping the reel during casting. The magnetic*

*brake system is designed to engage when the reel reaches a*

*certain speed. The magnetic brake system is controlled by a*

*microswitch that triggers the magnetic brake system to engage*

*when the reel reaches a certain speed. The magnetic brake*

*system is controlled by a microswitch that triggers the magnetic*

*brake system to engage when the reel reaches a certain speed.*
